

# Nasreen Khan

Purposeful, positive, practical and a little playful

## Overview

Nasreen is an optimistic and empathetic human being. A skilled coach and facilitator, she is honoured to be recommended by over 99% of the clients she has ever worked with. She brings simplicity, authenticity, and commitment to whatever she chooses to do. Three decades of experience, working both as a consultant and previously in senior HR and L&D roles, have taught Nasreen the importance of balancing the philosophical with the practical; she now judiciously brings in a mix of Eastern wisdom with Western research and knowledge to her work. Combining powerful intention and intellect with deeply honed skills of listening and coaching, Nasreen drives quick results and builds deep, long-term relationships.

With over 2,500 hours of coaching experience, Nasreen works both with CXOs and senior leaders in large organizations. Having been an entrepreneur herself, she loves working with founders and entrepreneurs to help them live their dreams. Nasreen is also passionate about facilitating group workshops on areas related to leadership, coaching, training and facilitation, and team dynamics. To this end, she has also co-authored a book on facilitation.
