

Aleksandra Strbac

Blending psychological depth with embodied practice

Overview

Aleksandra is a leadership development consultant, coach and facilitator with over 15 years of experience across IT, manufacturing, consulting and international service environments. She partners with managers, emerging leaders and senior stakeholders to strengthen leadership capability, navigate change and translate business priorities into meaningful development. Her coaching approach combines psychological insight, organisational understanding and practical experimentation, creating a thoughtful yet action-oriented space for clients.

She supports individuals and teams in developing self-awareness, confidence, communication, resilience and purposeful leadership, drawing on long-term practices in yoga, meditation and Tai Chi to help clients pause, access new perspectives and make more conscious choices. Aleksandra brings cross-cultural experience from Serbia and the United States, and is passionate about fostering learning cultures that enable sustainable business success.
